CAREER OBJECTIVE

Aspiring software engineer skilled in software development, DSA, and web technologies, aiming to learn and contribute effectively.

WORK EXPERIENCE

Software Engineer Intern - VCNR Technologies

In-Office | Feb 2025 – Apr 2025

- Developed a full-stack Virtual Art Gallery web application using the **MERN** stack (MongoDB, Express, React, Node.js) to enable users to explore and engage with digital artworks.
- Implemented **JWT authentication** for secure user login/signup.
- Integrated **Cloudinary** for optimized artwork image uploads and storage.
- Built interactive features including likes, comments, and artwork uploads, enhancing user engagement.
- Designed and developed an admin panel for managing artworks and users.
- Utilized **Redux** for state management.
- GitHub:** github.com/shadakshari/Virtual-Art-Gallery

EDUCATION

Presidency University

B.Tech in Computer Science and Engineering 2021-2025

CGPA – 7.93/10

PROJECTS

Virtual Art Gallery Application | MERN Stack

- Developed a full-stack **digital art gallery platform** enabling users to browse, view, and interact with digital artworks.
- Implemented **JWT-based authentication** for secure login/signup and protected routes.
- Implemented **OTP-based login**, reducing unauthorized access attempts and improving overall authentication security.
- Integrated **Cloudinary** for efficient artwork image uploads, compression, and cloud storage.
- Built core features including **artwork uploads, likes, comments, and detailed artwork pages**.
- Designed and developed a dedicated **Admin Panel** for managing artworks, users, and reported content.
- Managed global application state and UI flow using **Redux**, ensuring smooth user experience.
- Built using **React.js (frontend)**, **Node.js + Express.js (backend)**, and **MongoDB (database)** with **REST APIs**.

Income Tax Fraud Detection | Machine Learning & Deep Learning

- Built ML/DL models using **Random Forest, Decision Tree, XGBoost, CNN**, and **LSTM**.
- Designed preprocessing pipelines: handling missing values, **one-hot encoding**, scaling.
- Created evaluation strategies for accurate fraud detection.
- Contribution: Helped develop an interpretation-friendly and scalable solution forming a base for future fraud-detection advancements.

SKILLS

- Languages: Java, Python, JavaScript, C/C++.
- Frameworks and Libraries: React Js, Spring, SpringBoot, Express Js.
- Databases/Tech-Stack/Version-Control: MySql, MongoDB, MERN Stack, Java Full Stack, Git, Github.

CERTIFICATIONS

- Google Cloud Skills Boost - [Google cloud skills Badges](#).
- SimpliLearn - Introduction to Supervised and unsupervised Machine Learning.
